Education

D Y Patil College of Engineering and Technology	**Aug. 2021 – May 2025**
Bachelor of Engineering in Computer Science	*Kolhapur, India*
Sanjay Ghodawat Junior College	**Jun. 2019 – Mar. 2021**
HSC (12th Grade)	*Kolhapur, India*
Late. Narayandev Keshav Kulkarni Highschool	**Jun. 2018 – Mar. 2019**
SSC (10th Grade)	*Sangli, India*

Technical Skills

Programming Languages: Java, JavaScript, Python
Backend Development: Node.js, Express.js, RESTful APIs, WebSockets, JWT
Frontend Development: HTML5, CSS3, JavaScript, React.js
Database Systems: MongoDB, MySQL
Cloud & DevOps: AWS (EC2, S3), Docker, Linux, Shell scripting, Git, Github

Experience

Sinek Marketing Technology Pvt. Ltd.	**June 2024 – July 2024**
Software Developer Intern	*Kolhapur, India*

- Designed a Firebase database to manage events, enabling real-time event updates and actionable insights.
- Optimized Node.js/Express.js APIs, reducing server response time by 30% and boosting system throughput.
- Increased admin team productivity by 20% by building React dashboards with real-time charts and filters.
- Automated event analytics reporting, reducing manual planning time for the marketing team by 15%.

Projects

Inventra: Full Stack Inventory Management System — Source Code
- Built a comprehensive inventory system that cut the team's manual stock tracking time by 65%.
- Added a low-stock alert, which led to drop in missed restocks by 40%.
- Created a data import tool for supplier info, turning a 2-hour daily task into a 15-minute job.
- Designed a simple dashboard that helped us spot sales trends 3x faster than before.

Wanderlust: Travel Discovery & Planning Platform — Source Code
- Developed a travel platform where users could plan trips faster almost 50%.
- Integrated Google Maps API to show cool spots nearby, making recommendations relevant by 35%.
- Focused on speed, tuning the MongoDB backend to get server responses under 400ms.
- Handled secure login for multiple users using JWT and bcrypt to keep their data safe.

AI Virtual Mouse: Gesture-Driven Input System — Source Code
- Delivered a fun project that turns your webcam into a virtual mouse using Python.
- Got it running in real-time with only 120ms of lag by tweaking the OpenCV processing pipeline.
- Achieved 94% accuracy in translating hand movements into cursor commands.

Certifications

Oracle Cloud Infrastructure 2025 — AI Foundations Associate

Generative AI with — Google Cloud

Walmart Global Tech Advanced Engineering Program — Forage

Extra-Curricular Activities

Google Developer Student Club (GDSC): Engaged in workshops and tech talks to enhance technical skills and community collaboration.

Competitive Programming: Awarded Certificate of Participation in **Coding Combat**, in a college level contest on Unstop.
